Claim Objections

1. Claims 3-5 are objected to because of the following informalities: "said call history"(claim 3, lines 6 and 9; claim 4, lines 2-3; claim 5, line 5) should be changed to ----said call histories---- for consistency with previous "call histories". Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is vague and indefinite because it is unclear as to which of "reserved connection information" (claim 1, line 9), "updated reserved connection information" (claim 1, line 9), and "switch connection information" (claim 3, lines 3-4) that "said connection information" in lines 7-8 is referring to.

Claim 6 is rejected in virtue of its dependency on claim 5.

Allowable Subject Matter

4. Claims 1-2 are allowed.
5. Claims 5-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2665

6. Claims 3-5 are objected to but would be allowable if rewritten to overcome the objection as set forth above.

Reasons for Allowance

7. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-6, the prior art of the record fails to teach or suggest an ATM (Asynchronous Transfer Mode) switching system for connecting a plurality of subscriber's terminal units with a switching network by the use of an ATM switch operated in ATM comprising a call signal processing section provided with "a second means for using said updated reserved connection information which has been stored in said reserved connection memory to control said ATM switch in the case where there was a call from any of said subscriber's terminal units after applying said first means and the request for connection is the same as the reserved connection information which has been updated and stored in said reserved connection memory," in combination with other limitations, as specified as in independent claim 1.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
